A communication was read from Mr. Crocker Snow of Ames-Skyways, Inc., submitting a plan for consolidated management of three of the companies now operating at the Boston Airport. It was
Voted, not to approve the plan and that the Secretary be instructed to notify Mr. Crocker Snow that the Board has given very careful consideration to this proposal and that it is very desirous of giving all the assistance and cooperation necessary to help make the business a successful one, but it believes that as the Airport is maintained out of the public funds that the public interest should be considered first, before anything else. The Board believes that if this consolidation is permitted to go through without restrictions that independent operators and owners would be forced to go to one company for all storage and repairs and that future competition would be stifled, which would make an undesirable situation and would subject the department to justifiable criticism. The Board believes that this situation would make a monopoly that should not be permitted as, in its opinion, it is against the best interests of the public. For this reason the Board regrets very much that it can not approve the plan.
